ADJUSTING TO THE NEW NORMAL WOMEN'S PERSPECTIVES

THEME OF THE WEBINAR-

Life in the times of pandemic has been of fear and uncertainty. Although the virus infects people indiscriminately, it has been found to have different effects on different groups, communities, ethnicities but the stark divide have emerged with regard to gender. Thus, viewing the pandemic through a gender lens is essential in order to address the differential impact of the pandemic on the genders. COVID 19 will have a long term impact on the family, society, communities, and on the gender relations. Lack of gender responsive pandemic control policies will put women at the risk of being neglected yet again. The webinar will focus on women's response to the pandemic and how they are adjusting to the 'new normal' in their everyday lives.
